

be accomplished using incinerators especially designed for that purpose. Incinerators will be designed and operated to meet all applicable air pollution control requirements (chap. 3, AR 420-47).

(d) When contracting for off-post disposal of solid wastes from Army facilities by municipal or private facilities, the contractor must comply with Federal, State, and local guidelines.

§ 650.111 Procedures.

(a) Operation of solid Waste Collection and Disposal Systems (including Source Separation and Resource Recovery) will be accordance with AR 420-47.

(b) "Army installations will comply with all Federal, State, interstate, and local requirements, both substantive and procedural, including permits and reporting (Pub. L. 94-580)." Resource Recovery facilities established in accordance with AR 420-47 will be compatible with State and local plans.

(c) Management of Army solid waste programs at the installation level will generally be accomplished by the element which is already functionally responsible for refuse collection and disposal. Recyclable/marketable materials will be referred to the Defense Property Disposal Service (DPDS) for sale.

(d) Duplication of effort will be avoided in the collecting, sorting and transporting of recoverable waste by combining new and existing efforts. Military Exchanges and Commissary Stores, which purchase or lease processing equipment, may salvage and dispose of their recoverable resources.

§ 650.112 Reports.

(a) Sources of solid waste will be identified, and those requiring remedial action will be reported as specified in subpart J. An example of an exhibit prepared on a typical solid waste facility found not to be in compliance with specified standards is at figure 10-5, (RCS DD-I&L(SA) 1383).

(b) The Managing Activity of a recycling program will complete an Annual Report of Solid Waste Source Separation and Resource Recovery/Recycling Operations in accordance with AR 420-47, (RCS DD-I&L(A) 1436).
